

	Packaging	DHA/ARA Processing	Added Carbohydrate	Fluoride Milk/Soy (ppm)
<b>Organic Brand</b>				
<b>Baby's Only Organic Formula</b>	BPA Free as of 2010. Uses recycled paperboard and BPA Free metal.	Does Not Contain Life DHA™, Hexane, or Melamine. DHA and ARA fatty acids are derived from egg phospholipids using an aqueous process. (Note: DHA provided as a separate supplement and not added to actual formula)	65% Organic Brown Rice Syrup & 35% Naturally Occurring Organic Lactose	0.11/0.20
<b>Earth's Best Infant Formula</b>	BPA FREE. All formula is in powdered form and is packaged in recycled paperboard canisters with the interior lining polypropylene. The top and bottom are steel and aluminum alloys and are BPA Free. Note: New BPA Free packaging is "smooth".	Earth's Best said they use Life DHA and ARA from the Martek Corporation. The hexane solvent method is the only FDA approved method of extraction. No hexane is detectable in the product according to the company.	Organic Lactose	0.11/0.12
<b>Parent's Choice Organic</b>	BPA FREE. All formula is in powdered form and is packaged in composite paperboard canisters. The top and bottom are steel and aluminum alloys and are BPA Free.	Uses Life DHA and ARA from the Martek Corp.	Organic Lactose	Parent's Choice Milk Based 0.05 Parent's Choice Gentle 0.07 Parent's Choice Lactose-Free 0.13 Parent's Choice Organic 0.06
<b>Ultra Bright Beginnings</b>	BPA FREE. All formula is in powdered form and is packaged in composite paperboard canisters. The top and bottom are steel and aluminum alloys and are BPA Free.	Uses Life DHA and ARA from Martek BioScience	Organic Lactose	n/a

	Packaging	DHA/ARA Processing	Added Carbohydrate	Fluoride Milk/Soy (ppm)
<b>Vermont Organics</b>	BA FREE composite cardboard. Old steel cans were BPA free, some of which may still be out there but all new packaged formula and formula ordered direct is in new BPA free packaging.	Uses Life DHA and ARA from Martek BioScience	Organic Lactose	n/a
<b>Similac Organics</b>	Similac comes in prepared liquid formulas packaged in plastic and in powdered form in both a canister and in their new SimplePac packaging (HDPE). in 2008, Similac said that formula packaged in the SimplePac never comes in contact with BPA but they would not state whether the packaging is BPA Free. There is a removable foil seal inside the lid that I suspected contained BPA but this is a speculation. I called them again and they now are allowing representatives to say that Yes, all their formula packaging is BPA Free.	Similac® does not disclose their source of DHA and will only state that it comes from "microorganisms grown in commercial manufacturing facilities".	Organic Maltodextrin, Organic Sugar from Evaporated Cane Juice (Sucrose) Banned in the EU due to risk for obesity cause. The representative said Organic Lactose is also present but only as a result of the Organic Milk content. They do not add additional Lactose.	0.03
